

Z-Band® Wristbands for Adult patients

SEE MORE. DO MORE.

Zebra's direct thermal printable wristbands offer a simple and effective method of identifying patients quickly and clearly with minimal fuss. Designed for use in Zebra's market-leading thermal printers, durable text and barcodes can be printed on-demand to help ensure positive patient identification.

Failure to correctly identify patients is one of the most serious risks to patient safety. Zebra's range of adult wristband solutions covers a wide range of requirements from those relating to patient comfort and reducing medical errors through to improving workflow and streamlining admissions processes.

Adult wristbands need to cover a wide range of patients from young adults to the elderly and infirm. Zebra's Z-Band thermal wristband products are specifically designed with these patients in mind and include the following elements and key features:

- Direct thermal, ribbon-less printing for superior ease-of-use and the ability to quickly print and apply to patients.
- Wide range of materials designed to cover a range of patient concerns and hospital stays.
- UV varnish provides resistance to water, hand-sanitiser gels, mild cleansers and other substances used in hospitals, ensuring print remains legible throughout a typical hospital stay.
- Antimicrobial coating helps prevent the spread of common hospital infections.
- Wristbands include tamper-evident security slits to ensure wristbands cannot be removed and re-applied.
- Wristbands are available in white and red, with red bands typically being used as a visual alert to nursing staff, where a patient has a specific medical condition.

Z-BAND WRISTBANDS FOR ADULT PATIENTS

SPECIFICATIONS AT A GLANCE*

Z-Band Direct wristbands

Our most popular direct thermal wristband material, designed specifically for patient identification. A flexible polypropylene with a protective varnish and an intuitive adhesive tab closure design offers comfort, durability and simple application for busy nursing staff.

Z-Band UltraSoft wristbands

Offering the same durability and ease-of-use benefits as Z-Band Direct, Z-Band UltraSoft is the softest direct thermal printable wristband on the market. Developed specifically to meet the needs of patients with delicate skin, this flexible synthetic material has a soft-feel reverse side for superior comfort.

Z-Band QuickClip wristbands

For facilities preferring wristbands with a clip closure, Z-Band QuickClip is a flexible polypropylene with a protective varnish. Supplied with white clips as standard, coloured clips are also available to order.

All the above wristband types are MR-Safe[†] and available in cartridges for use in Zebra's unique HC100 wristband printer or in rolls for Zebra desktop printers.

Z-Band Fusion wristbands

Perfect for use at long-term care facilities our self-laminating direct thermal polypropylene wristband offers superior durability and ensures that the printed information stays protected and scannable for up to 60 days. A wristband extender bar is included with each band to allow greater flexibility in identifying bariatric and oedema patients.

Z-Band direct thermal wristbands are latex-free and are suitable for use in Zebra's small footprint thermal printers, allowing for wristbands to be printed from computers-on-wheels (COWs) or at crowded workstations. The following table shows wristband compatibility by printer type.

	 HC100™	 G-Series™	 LP 2824 Plus™
Z-Band Direct	✓	✓	✓
